Relevant Experience

June 2021 - August 2021

Product Intern - commercetools

I designed, developed, and deployed moderncommercetools.com, a website that helps big businesses navigate the modern e-commerce landscape with unbiased transparency as a priority. I iteratively developed the website with full responsibility over research, design, and implementation.

March 2021 - August 2021

Researcher - Association for Computing Machinery

I researched and authored "Designing for Night-Time Reflection," an ACM-approved exploratory research paper on how to support people engaging in night-time reflection based on analysis of data from semi-structured interviews and an online survey.

January 2021 - March 2021

UX Designer - ForestHealthWatch

In collaboration with ForestHealthWatch, I designed Symbiosis, an app that aims to raise awareness about environmental issues by motivating younger teens to appreciate and interact with nature.

September 2019 - December 2019

UX Designer - Watchful Walking

Understanding concerns over safety around the University of Washington campus, I designed and prototyped Watchful Walking, an app that appeals to students' desire for companionship when commuting to and from campus.

Awards

October 14th, 2021

SIGDOC Student Research Competition Finalist

I presented and placed third in the highly competitive undergraduate division of the ACM SIGDOC Student Research Competition, where I presented my research on night-time reflection to professional researchers around the world.
